EXPERIENCE

Swqly, Senior Software Engineer | Egypt, Remotely Sep. 2024 – Current

Swqly is a SaaS providing e-commerce systems for merchants.

- Designed the system architecture, database schema, and development patterns that became the foundation for the product.
- Led and mentored junior developers, ensuring high-quality code, knowledge sharing, and team growth.
- Contributed as a team player in an early-stage startup, aligning engineering decisions with business goals.

PayTabs, Software Engineer | Global Team, Remotely Jan. 2023 – Sep. 2024

PayTabs is one of the top 10 payment gateways in the world.

- Designed and developed backend services in Go + SQL Server to support millions of financial transactions on a distributed system.
- Led major integrations with banks, fintech providers, and government agencies across the MENA region.
- Created tools to process financial reports, cutting manual work by 90%.

Shabahy, Backend Engineer | Egypt, Remotely Apr. 2022 – Jan. 2023

Shabahy is a social media platform.

- Worked with the frontend team to build and provide fully working backend services with RESTful API architecture using Go and PostgreSQL.
- Added support for sending images and voice messages to the chat.

My Duties, Full Stack Web Developer | Saudi Arabia, Remotely Dec. 2021 – Apr. 2022

My Duties is a tasks management platform.

- Rebuilt legacy platform into Vue.js SPA and Laravel backend, improving UX and scalability.
- Restructured the database and developed a tool to transform records from the old schema to the new schema resulting in increased the platform's overall performance by ~20%.

GrowthArabi, Full Stack Web Developer | Jordan, Remotely Apr. 2020 – Dec. 2021

GrowthArabi is a digital marketing agency.

- Built multi-role web platforms with PHP and MySQL.
- Worked with the UI/UX design team to convert the designs into fully working pages (responsive) using HTML, CSS, Bootstrap, and Vue.js.
- Built a payments system integrated with PayPal that includes coupons, receiving money, and sending money.

Khatwaa, Backend Engineer | Saudi Arabia, Remotely Jul. 2019 – Mar. 2020

Khatwaa is a startup freelance marketplace.

- Worked with the frontend team to build fully working pages with MVC architecture using PHP, Laravel framework, and MySQL.
- Optimized SQL queries resulting in decreased search load time by ~10%.
- Built real-time multi-rooms chat system using laravel-websockets with access rules.
- Built a payments system integrated with BayanPay that includes receiving money and sending money.

Freelancer, Full Stack Web Developer | Global, Remotely

Feb. 2018 – Jul. 2019
